

The goal of SCMHCC is to provide confidential and cost effective care that is easily accessible. Most insurance

charges for SCMHCC

companies, including Medicare and Medicaid, provide coverage for our services.

For individuals without insurance or other financial resources, fees can be established at a reduced rate provided that you are a resident of Butler County.

Additional information regarding fees can be obtained by contacting one of our local clinics.

Our Mission – To provide quality mental health services that empower individuals, families, and the communities of Butler County to help shape promising futures.

Our Vision – Exceptional care that results in a meaningful difference.

We are a non-profit community mental health center offering a wide range of outpatient

about SCMHCC

mental health services. Our highly trained Psychiatrists,

Psychologists, Marriage and Family Therapists, Nurses and other specialized staff, work as a team and are committed to providing research-based services in a supportive environment to improve the lives of the children, adults, families, and the communities we serve.

*helping to
shape promising futures*

Stress in children can manifest as chronic conflict with parents, failing grades, and poor peer choices, to name a few. Our staff thoroughly assesses the root cause of difficulties in order to provide the most appropriate and best treatment that is available.

Community Support Services

- Supported Employment
- Educational Development/Support
- Family Support/Education
- Respite Care
- Therapeutic Pre-School

Community Support Services are designed for children and adults with severe mental illnesses or behavioral problems that sometimes put them at risk for hospitalization or other out-of-home placement. Services are often provided in natural settings and developed to meet specific needs so that the person can develop the skills necessary to live a productive and gratifying life within his or her community. The ultimate goal is recovery from the illness.
